DETAILED ACTION

1. The application filed October 6, 2003 is presented for examination and claims 1-4 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being unpatentable over US Patent Application # 20040036622 by Dukach et al.

Regarding claim 1, Dukach et al. teach a multimedia advertising billboard

(Communication of information to the public is a major industry. One of the major means of such communications is by publicly visible signs, including advertising signs

(paragraph 0010) comprising a waterproof box (a car-top box has a plastic cover (paragraph 0371) is inherently waterproof, that is a rectangular box that is installed on the outer wall of buildings (the car-top box could have four displays, each located along one side of a rectangular shape (paragraph 0374); two liquid crystal displays (the LCD panel displays 142 are disposed on each side of the box (see Figure 42) arranged on the left and right sides of the waterproof box and connected with a computer (an industrial grade computer 1030 that corresponds to the mobile unit controllers 140 (paragraph 0370) inside the buildings (the car is interpreted to be a building in the claim) so as to play animated advertisement (this display unit's programming 160 includes programming 161 for generating animated video output from vector-based representations of animation. This has the benefit of enabling animated, relatively high-resolution images to be generated on a display unit from files that are relatively compact (paragraph 0142) by the program of the computer.

Regarding claim 2, Dukach et al. teach the liquid crystal display can be replaced by a plasma display panel (the displays 142 and 144 can be virtually any type of display capable of showing an electronically encoded image including, for example, liquid crystal, LED, gas <u>plasma</u>, electronic ink (of the type being developed by Eink Corporation, and similar technologies), electronic paper (such as Gyricon, being developed by Xerox PARC, and similar technologies), and cathode ray tube displays (paragraph 0139).

Regarding claim 3, Dukach et al. teach the computer is disposed inside the waterproof box (an industrial grade computer 1030 that corresponds to the mobile unit

Application/Control Number: 10/678,188

Art Unit: 2629

controllers 140 (paragraph 0370) disposed inside the car-top box between the displays 142 and 144.

Regarding claim 4, Dukach et al. teach the computer is disposed inside the waterproof box that is installed on a car (car-top box Fig.3 (174)).

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean Lesperance whose telephone number is (571) 272-7692. The examiner can normally be reached on from Monday to Friday between 10:OOAM and 6:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Hjerpe, can be reached on (571) 272-7691.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(571) 273-8300 (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal drive, Arlington, VA, Sixth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the technology Center 2600 Customer Service Office whose telephone number is (703) 306-0377.
